

JUNIOR BUILDER[®]

BUILDER

A SOLID FOUNDATION IN EDUCATION

INTRODUCTION

Junior Builder is an exciting and unique educational programme that uses Duplo[®] and Lego[®] bricks as a tool of teaching, bringing the children back to basics and ensuring a solid foundation in education.

WHY JUNIOR BUILDER?

Children learn best through play, because play comes naturally and easily to them. At Junior Builder we understand the importance of learning whilst playing and therefore strive to create an environment where children can explore and develop their ideas, curiosity and imagination. Our programme is designed to excite and motivate children to attain skills and knowledge that are necessary for lifelong learning. We are passionate about developing fun and playful learning techniques using Duplo[®] and Lego[®] bricks and other materials.

WHY DUPLO[®] BRICKS?

Duplo[®] bricks are the perfect size for young children to handle with confidence in the short amount of time. Because of the size of the Duplo[®] brick, children are able to quickly build outside their field of vision. The children develop abstract thinking and are able to use their own imagination to build creative solutions to problems and develop important life and learning skills.

WHY LEGO[®] BRICKS?

As the children progress in our programme, we want to ensure that the child remains challenged and stimulated throughout. We therefore introduced Lego[®] bricks to ages 7 - 8 years. Lego[®] being smaller allows the child to further develop fine motor skills, dexterity and strength in the fingers. Because of the size of the bricks the child needs to persist, persevere, focus and concentrate a lot more whilst still problem solving and developing important life and learning skills.

SKILLS DEVELOPED

PERCEPTUAL SKILLS:

Developing the senses – visual discrimination, auditory
